From the leaders in tire technology come the latest achievements in design and performance.

Infused with an all-new race-inspired compound, the ADVAN Neova® AD08R offers improved grip and a faster ride for drivers who push the limit.

**MS COMPOUND 2R**
The best of racing and science combine in this specialized compound to deliver greater stiffness for unprecedented performance.

- **Orange Oil**: Enhances adhesion to road surfaces.
- **Micro Silica**: Ensures solid wet grip.
- **More Carbon**: Further improves dry grip.
- **Macromolecule Blended Polymer**: Improves rigidity and resistance to wear.

**SPORT COMPOUND 5S**
An advanced compound developed with leading European car manufacturers for powerful wet and dry performance.

- **Orange Oil**: Enhances adhesion to road surfaces.
- **Micro Silica**: Enhances traction.
- **Silica Dispersant**: Even distribution of silica for consistent performance.
- **Chemically Bonded Polymer**: For long tread wear and wet grip.

**TARGETED CONSTRUCTION**
Size-specific construction optimizes sidewall stiffness and maintains a consistent profile under lateral loading for improved handling throughout the line.

**MATRIX RAYON BODY PLY**
Incorporating race tire technology, body plies constructed of lightweight, heat resistant material are turned up from the sidewall at a precise angle for increased rigidity and enhanced steering precision.

**UNIBLOC SHOULDER WITH HYDROARC CHANNELS**
Extra-wide shoulder blocks provide constant rubber-to-road contact for improved lateral stability during high-speed cornering. The unique channel shape of the grooves cuts through water for superior grip in wet conditions.

**VARIABLE PITCH TREAD DESIGN**
Reduces pattern noise, offering a quiet and comfortable ride.

The ADVAN Sport® V105 is a category leader delivering impressive handling in wet and dry, along with refined comfort for the perfect drive.

**HIGH-SPEED PERFORMANCE**

**HANDLING**

**ASYMMETRICAL PATTERN**
Wider tread blocks on the outside of the tread enhance dry handling, while the increased groove area on the inner portion maximizes wet performance.

- **Wet Performance**
- **Dry Handling**

**COMFORT**

**SPORT COmpOUND 5S**
An advanced compound developed with leading European car manufacturers for powerful wet and dry performance.

- **Orange Oil**: Enhances adhesion to road surfaces.
- **Micro Silica**: Ensures solid wet grip.
- **Macromolecule Blended Polymer**: Improves rigidity and resistance to wear.

**Find the Right ADVAN Tire to Meet Your Performance Needs**

**ADVAN Neova AD08R and ADVAN Sport V105** represent a long line of proven innovations for your performance vehicles.

**ADVAN Neova AD08R**
- **MS Compound 2R**
- Optimized Contact Patch
- Rapid Reflex Twin Ribs
- Unibloc Shoulder
- Steel Sidewall Inserts
- UNPRECEDENTED GRIP/HANDLING AND EVEN FASTER

**ADVAN Sport V105**
- **Sport Compound 5S**
- Matrix Rayon Body Ply
- Asymmetrical Pattern
- Unique Sport Profile Ribs
- Variable Pitch Tread
- MAXIMUM WET & DRY GRIP PRECISION HANDLING PLUS COMFORT

**Technology Difference**
Yokohama’s latest advances lead to world-class performance. (See front for details.)

**Proven Performance**
Yokohama reached new levels of performance with its latest ADVAN® offerings and the tests confirm it.

**Average Lap Time in Seconds**
- Lower number is better.
